Fasting blood sugar

Green band = target before breakfast (70–130 mg/dL).

What this means

- ✓ Medicines are working: BP is now inside the healthy range, and fasting sugar dropped 41 points.
- ✓ 93% of doses taken on time — good control usually needs 80% or more.
- ! The 9 PM Diabmexa dose was missed 4 times. Tip: keep the strip next to your dinner plate.
- → Treatment effectiveness score 86 / 100. Share this report with Dr. Mehta at your next visit.
